

Rainbow Challenges: Autumn Term 1

In addition to some short class and group teaching sessions the reception curriculum will involve a variety of rainbow challenges which the children will be encouraged and supported to complete during the day or week as part of the continuous provision within the class. The challenges will all relate to the areas of learning from the EYFS curriculum and will also evolve to include the interests of the children as appropriate. Please make sure you have returned the 'getting to know me' information if you haven't already done so.

Red	Literacy: Reading / Phonics
Orange	Expressive Arts and Design
Yellow	Literacy: Writing
Green	Understanding of the World
Blue	Mathematics
Purple	Personal, Social, Emotional Development

Once a child has completed a challenge and shown an adult they will be awarded the appropriate coloured heart to attach to their rainbow chart. Over the week they will be expected and supported to complete a whole rainbow which can then be celebrated in our class celebration assembly on a Friday. Alongside their rainbow chart they will have a space in which to display work that they have completed during continuous provision allowing them to take some ownership of their learning and also to allow others to see and praise their achievements.

We will be using Tapestry as a way to record some of the children's achievements in school and also ask you to record significant events and achievements at home, this way it becomes a useful tool for communication. As there has been a change in emphasis linked to assessments and evidence collection in EYFS not all achievements will be documented and shared on Tapestry, but hopefully it will still be a useful source of information for you. Please look out for further details about how to access Tapestry .
